

Math

- NodeList num1
- NodeList num2
- + NodeList add()
- NodeList_add(NodeList, NodeList, int)
- + NodeList multiply()
- NodeList_multiply(NodeList, NodeList, int)

Node

- int value
- Node next
- + Integer getValue()
- + Node getNext()

NodeList

- Node head
- Node cur
- + String toString()
- + void append()
- + int getLength()
- + Node getNext()
- + Integer getValue()
- + void remove()
- + Node incrementCur()
- + Node getCur()
- + void resetCur()
- + NodeList reverse()

File Processor

- + static void processFile()
- + NodeList convert
- + String[] removeEmptyStrings()
- + static String operate(String, NodeList, NodeList)
- + static String removeZeros(String)

BigNum Arithmetic

- + static void main(String[])
